Allowable Subject Matter

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:
[Claims 1-12]: A digital camera for acquiring an image data by acquiring a subject image comprising " ... a piezoelectric element configured to displace said imaging device; a detecting circuit configured to detect a representative voltage indicative of a level of voltage presently being applied to the piezoelectric element; a comparing unit configured to compare a reference voltage corresponding to a predetermined amount of displacement of the imaging device with the representative voltage detected by the detecting circuit and to provide an output indicating that the representative voltage detected by the detecting circuit is less than the reference voltage a charging unit including at least one energy accumulating unit configured to power a strobe unit; and a control element configured to supply electricity from the energy accumulating unit of the charging unit to the piezoelectric element to raise said level of voltage presently being applied to the piezoelectric element responsive to the comparing unit providing the output indicating that the representative voltage being detected by the detecting circuit is less than the reference voltage in combination with other claimed elements.
3. The prior art Tanaka (USP 4,884,090) teaches a piezoelectric element driving a shutter blade. Therefore there is no motivation to combine Tanaka with Udagawa which discloses a piezoelectric element driving an imaging device.
